“We offer a wide range of interactive and engaging courses for individual students”

I’m proud to present our summer courses for individuals for 2025.

In 2024 we ran a hugely successful programme of courses. This included new STEM programmes at Bosworth Independent School and Guildhouse School, the wonderful and unique CSVPA Branding & Advertising course in London, a dedicated IELTS Preparation summer programme at Bosworth Independent School. We are also excited about the evolution of our business focused course in Boston which has transformed into our Young Business Leaders course for 2025. The Fashion Make Up course at CSVPA, which I had the privilege of attending students’ final demonstration and presentation, was another notable success in 2024.

When visiting our summer programmes I am struck by the fact that there is no ceiling to what young people can achieve, even in a short period of time. The end of course projects and presentations across our portfolio demonstrate how much our students have been inspired to take on board and demonstrate their skills and passions- from submissions at the Model United Nations Conference, presentations on camera on the London Academic Explorer, theatrical and musical performances on the Acting and Musical Theatre courses, final short films on the Film-Making course or market assessment presentations on the Bloomberg Business Advantage- the sky is the limit for what our students are able to achieve.

In 2025, we continue to offer our full range of inspiring summer courses, across the UK and USA. I’m excited to highlight that our students studying at CATS academy Boston for 2 weeks now have an included day trip to New York. We are pleased to include many improvements in the programmes, especially at Guildhouse School and CATS Academy Boston, to allow for more engagement with the fantastic cities our courses are located in, ensuring there is an even better balance of learning experiences both inside, and outside the classroom.

This course includes 23 hours of English tuition. Students will take part in 15 hours of morning lessons each week which are divided into 3 hours per day. DEVELOP YOUR SKILLS IN:

In this introductory course, students will develop skills across all phases of the comic book creation process. From writing to coloring, students will explore and experiment with the tools, formats, and mediums used by professionals.

SCRIPTWRITING

In the business of comics, it is often the case where one person writes the story and another draws the comic. Students will learn how to put their vision into words and write a detailed, professionally formatted script.

DEVELOPING CHARACTERS

What makes a character relatable and believable? Why do we care about characters and how do they affect our emotions? We will discuss these ideas and learn how to write multidimensional characters.

COMIC VOCABULARY

What is a panel? What are closure and juxtaposition? We will discuss the terminology in the universal language of comics.

DIGITAL COLORING

Capture the eye of the reader with brilliant colors using Adobe Photoshop. We will learn the importance of a limited color palette and how to effectively create mood and contrast.

PAGE LAYOUT AND COMPOSITION

Comics are a visual medium first and foremost. A visually enticing comic page can help effectively tell the story. The job of the artist is to create illustrations that capture the reader, tell the story and, simply put, look cool!
