

Professional Certificate Courses – Business Management

Course Description and Goals

The Professional Certificate in Business Management is a four-week course which provides international students with advanced English level with a foundation of management concepts in the global marketplace of the 21st century. Current management practices within an application environment will be introduced, and students draw upon their prior learning and work experience and become familiar with success strategies for managing a business and managing people.

By the end of the course participants will:

- ✓ Understand different types of business structures and their purposes
- ✓ Understand different business environments and economic realities
- ✓ Understand business management styles
- ✓ Know what is involved in effective entrepreneurial leadership
- ✓ Understand different functions of management and their use and importance
- ✓ Develop strategic and tactical planning techniques
- ✓ Understand organization practices to effectively run a business
- ✓ Be able to identify leading and motivation skills of a manager
- ✓ Understand organizational control and management tools

Classroom Methodology

The course is highly practical, relevant, and an applicable experience for our students.

Classroom activities include: lectures to introduce and explain concepts, project-based group and individual work such as presentations, case studies, and the creation of a business management consulting plan. The use of up-to-date technology is integrated throughout the course.

The course focuses on the major principles, definitions and key terms of Business Management, demonstrating how managers plan, organize, lead and control their organizations. Examples based on well-known global brands are used to express management essentials. The examples build on text materials, videos and discussions and involve students in the real-life analysis of management.

Sample Syllabus

Week 1

- Key Concepts and Theories: The Management Process Today / History of Management / Values, attitudes, Emotions, and Culture: The Manager as a Person
- Case Studies: Costco / Theories X and Y / Disney
